

Theriologia Ukrainica

ISSN 2312-2749 (Print) ISSN 2074-2274 (Online)

Dear colleagues,

Theriologia Ukrainica is a scientific peer-reviewed journal established in 1998 by the Ukrainian Theriological Society and formerly published as *Proceedings of the Theriological School*.

The journal publishes scientific contributions presenting the results of original research on various aspects of mammalian biology, in particular fauna, ecology, distribution, evolution, taxonomy, variability, diversity, and conservation. Reviews, surveys, short communications, historical investigations, and chronicles are also welcomed, but simple faunal checklists without any kind of analysis are not considered.

An important aspect of the journal's policy is search for and support of young authors.

The journal is approved by the Ministry of Education and Science of Ukraine as a specialized scientific edition in the field of Biology (Decree No. 1604, 22.12.2016).

Manuscripts should be submitted via e-mail to mammalia@ukr.net by the corresponding author. Ukrainian and English language manuscripts are preferred.

The Editorial Board ensures the respect of consistent and fair policy, and encourages authors to follow academic ethics. To avoid contradictions and observe ethical requirements our authors are asked to declare their authorship and potential conflict of interests.

All papers published in our journal are open-accessed and available on the web site of the Ukrainian Theriological Society (www.terioshkola.org.ua) and of Vernadsky National Library of Ukraine (www.nbu.gov.ua).

A brief review about the history of the journal, as well as information about the Editorial board, editorial policy, and guides for authors are available on the web site of the Ukrainian Theriological Society (www.terioshkola.org.ua/ua/pts.htm).

Welcome to cooperate!

Igor Zagorodniuk PhD
